

Configuration ArcGIS

To be able to use ArcGIS in this class, we need to be able to connect to the Universities Licensing Server to be able to checkout a copy of ArcGIS Pro.

This document will detail how to do so.

When you open ArcGIS Pro, you should be prompted to log into ArcGIS Online. We will do this, but first, lets checkout the license to use ArcGIS Pro.

At the bottom of this window, there is an option to Configure Licensing.

The screenshot shows the 'ArcGIS Sign In' window. At the top, it says 'ArcGIS Pro wants to access your ArcGIS Online account information'. Below this, there's a 'Sign in with' section featuring the Esri logo. A dropdown menu is open, showing 'ArcGIS login' as the selected option. Under this, there are input fields for 'Username' and 'Password', followed by 'Sign In' and 'Cancel' buttons. Below the buttons are links for 'Forgot username?' and 'Forgot password?'. There's also a field for 'Your ArcGIS organization's URL' with a dropdown arrow. At the bottom of the main content area are social media icons for GitHub, Facebook, Google, and Apple, along with a 'Privacy' link. At the very bottom of the window, there's a checkbox for 'Sign in automatically', a link for 'Configure Licensing', and a button for 'Sign In Using Browser'.

Click that link.

That should open the following window.

Licensing

Configure Authorization

Select your authorization type from the drop-down list below:

License Type

[Learn More](#)

License Level

Select the Pro core product license level below:

License Manager

Name	Licensed	Available Seats	Expires
ArcGIS Pro Advanced	<input type="checkbox"/>	0	N/A

Change the License Type to Concurrent License.

For the License Manager, enter WNLS02.pugetsound.edu

Click Ok, and this should take you back to the main ArcGIS Pro Sign-In page.

Sign-In with you ArcGIS Online account, and you should be able to open the software now.

These configuration steps will need to be completed for every computer that you work on.
